SUMMARY

AI Engineer with **3+ years of professional experience** in Python-based AI systems, large language model (LLM) applications, and backend development. Experienced in building AI-powered services, integrating models via REST APIs, and contributing to modular architectures. Strong background in ML, NLP, and Agile software development.

TECHNICAL SKILLS

Languages:	Python, JavaScript, TypeScript, C#, C++
AI / ML:	LLMs, Transformers, NLP, Machine Learning, Computer Vision
Frameworks:	PyTorch, TensorFlow, Hugging Face, OpenAI API
Backend:	FastAPI, Flask, Node.js (basic), REST APIs
Web & Integration:	Web Applications, API Integration, JSON
Data Tools:	NumPy, Pandas, Scikit-learn, OpenCV, SQL
DevOps & Tools:	Git, GitLab, CI/CD fundamentals, Linux (basic)
Methodologies:	Agile, Scrum, Software Engineering Best Practices
Languages:	English (C1), German (A1 – improving)

PROFESSIONAL EXPERIENCE

Student Assistant – AI Engineer	TU Berlin (SNET Labs)	05/2025 – 12/2025
- Developed LLM-powered applications in Python, including command parsing and NLP-based automation. - Built backend services and REST APIs to integrate AI models with robotics and computer vision systems. - Worked on real-time AI services using OpenCV and camera streams, improving system accuracy by 25%. - Contributed to model evaluation, debugging, and iterative performance improvements.		
Software Engineer	NetSol Technologies, Pakistan	08/2022 – 09/2024
- Designed and implemented backend services and APIs for large-scale, production-grade applications. - Translated business requirements into modular software components using Python and .NET. - Improved performance and reliability of deployed systems through optimization and testing. - Worked in Agile/Scrum teams, collaborating with engineers, QA, and product stakeholders.		
Software Developer	Studio Mega Fury	06/2021 – 07/2022
- Developed scalable application logic and backend components for real-time systems. - Applied clean code principles and modular architecture to long-lived software products. - Collaborated in cross-functional teams following Agile development practices.		

SELECTED AI PROJECTS

LLM-Based Healthcare Chatbot (GitHub)	Python, LLMs, NLP, REST APIs
- Built an AI-powered chatbot using transformer-based language models. - Integrated LLM inference into backend APIs for real-time user interaction. - Implemented structured evaluation and logging for model performance tracking.	
Real-Time AI Vision System (GitHub)	Python, OpenCV, YOLOv8
- Developed real-time machine learning pipelines for object and shape detection. - Optimized inference performance for continuous AI services.	
Finance Management System (GitHub)	C#, .NET, SQL
- Built backend modules for data-driven applications with authentication-aware workflows. - Improved scalability and reliability through database and logic optimizations.	

EDUCATION

MSc Artificial Intelligence	Brandenburg University of Technology, Germany	2024 – Present
BS Computer Science	University of Engineering and Technology Lahore, Pakistan	2017 – 2021

CERTIFICATIONS

MERN Stack Development – Full-Stack Certification (2022)
Google Generative AI – AI Systems and LLM Foundations (2024)
